

# PRODUCT CONTENT LABEL

The product is sold in blocks of 100 kilowatt hours (kWh).  
The product will be made up of the following renewable resources.

Energy Resources	Green Power [projected power mix] <sup>1</sup>	Generation Location
<b>Eligible New Renewables<sup>2</sup></b>		
Landfill Methane Gas	> 99%	South Carolina
Solar	< 1%	South Carolina
<b>TOTAL</b>	<b>100%</b>	

The kWhs above represent the resource makeup of each block of renewable electricity you have purchased from Santee Cooper. The remainder of your electricity contains the following mix of electricity resources: Coal - 74.68%, Nuclear - 9.53%, Oil - .11%, Natural Gas - 7.64%, Hydro - 1.28%, Methane Gas - .17%, Purchases or Other - 6.60%.

The average electric usage for a Santee Cooper residential customer is 1,100 kWh.

<sup>1</sup> These figures reflect the power that we expect to generate and provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year.

<sup>2</sup> New Renewables are eligible generation facilities beginning operation on or after January 1, 2001.

For specific information about this electricity product, contact Santee Cooper at (843) 761-8000, extension 3205, or visit [www.santeecooper.com/greenpower](http://www.santeecooper.com/greenpower)

The Green-e Program certifies that Green Power meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e certification requirements call 1-888-63-GREEN or log on to [www.green-e.org](http://www.green-e.org).
